Greetings

The Prague Congress covers a wide range of safety topics, such as clinical safety (patient safety, medication safety, medical device safety), infectious disease outbreak, and other related safety subjects.

The key concept of congress is "Patient Safety Promotion by Multi-Occupation". Fusion of different knowledges generates mega power for great explosion of science. Fusion science is also essential to develop highly-advanced safe and clean science and technology.

After the previous Congresses in London, Heidelberg, Madrid, Vienna, Boston, Rome, and Bern, it is a time for the 8th Congress 2019 in Prague.

Let's enjoy the Prague Congress to meet together with multi occupations, share information and create your new global partnership at an early capitol of Holy Roman Empire.

Sincerely,

IARMM
